

If you feel your Bill or Water Use is incorrect, please ask the Clerk to do a Work order for the Maintenance Department to come pull a Water Usage Profile from your Meter. This data will tell the time stamp, date & hour that the water was used and the number of gallons. Give your name, address and phone number and how you want to be contacted back. You will be contacted once this work order is completed. This does not forgive your bill or excuse late charges. Any wrong findings on the part of the Water Department will be credited to your bill. You are allowed a one-time Water-Profile, all other request there will be a service fee.
